PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering student and a **Full-Stack Developer** with hands-on experience in building and deploying modern web applications using **React, Next.js, Node.js, Express.js, and PostgreSQL/MongoDB**. Experienced in developing real-world projects involving **authentication, REST APIs, database integration, web scraping, real-time applications, and AI-powered features**. Strong interest in software development, problem solving, and building practical applications using modern technologies.

SKILLS SUMMARY

Languages: C, C++, Java, JavaScript, TypeScript, SQL
Frontend: HTML, CSS, React.js, Next.js, Vite, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, REST APIs, CRUD Operations, Authentication, MVC Architecture
Databases: MongoDB, PostgreSQL, MySQL, NeonDB, Database Design
Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Netlify, Cloudinary
Libraries & Technologies: Prisma, Drizzle ORM, Clerk, Socket.io, Firecrawl API
Core CS: Data Structures, Algorithms, OOP, DBMS, Computer Networks, Operating Systems
Emerging Tech: Generative AI, AI API Integration, Prompt Engineering

PROJECTS

- **DealDrop – Smart Price Tracker (Link):** Built a smart price tracking platform that extracts product information from URLs and monitors price changes using the Firecrawl API. Implemented a responsive dashboard with PostgreSQL (NeonDB), automated price tracking, and a system designed for price-drop email alerts. Built using Next.js, Tailwind CSS, Firecrawl API, PostgreSQL, and Vercel.
- **Productify – Full-Stack Product Platform (Link):** Developed a full-stack product management application with user authentication, database integration, and a modern responsive interface. Implemented authentication using Clerk and database operations using Drizzle ORM with PostgreSQL. Built using Next.js, React, Tailwind CSS, PostgreSQL, Drizzle ORM, and deployed on Vercel.
- **Student ERP Portal (Project):** Developed a complete Student ERP system using PHP, MySQL/MariaDB, HTML, CSS, and JavaScript with separate student and administrator functionality. Implemented authentication, dashboard, profile, attendance, courses, results, examinations, fees, and administrative CRUD operations with responsive UI and session-based access control.
- **Weather Forecast App (Link):** Built a responsive weather application providing real-time weather information, forecasts, and location-based weather detection. Implemented dynamic UI updates based on current weather conditions using HTML, CSS, JavaScript, and WeatherAPI.

ACHIEVEMENTS

- Built and deployed **multiple real-world full-stack web applications** using modern frontend, backend, and database technologies.
- Developed hands-on experience with **AI-powered applications, REST APIs, authentication, database systems, and real-time web applications**.
- Successfully designed and implemented a complete **Student ERP Portal** with student and administrator modules, authentication, CRUD operations, and responsive UI.
- Hands-on experience with modern deployment platforms including **Vercel and Netlify**, along with Git and GitHub-based development.

EDUCATION

- | | |
|---|---------------|
| ● Sandip University | Nashik, India |
| ● <i>Bachelor of Technology (B.Tech) - Computer Science and Engineering; CGPA: 7.70</i> | 2024 - 2028 |
| ● Higher Secondary Education | |
| ● <i>Class XII; Percentage: 66.6%</i> | 2023 |
| ● Secondary Education | |
| ● <i>Class X; Percentage: 79.6%</i> | 2021 |
